

ANIMAL BIRTHDAY PREDICTOR (ABP)

Mare Management, Breeding Inseminations, 3-Stage Scans & Gestation Protocols

MILESTONE 2 DELIVERABLES
Production Release Report

Status: 100% COMPLETED
Database: Supabase PostgreSQL Sync OK

1. Milestone 2 Deliverables & Scope Summary

Milestone 2 establishes the core clinical and gestational foundation of the Animal Birthday Predictor. It covers end-to-end Broodmare lifecycle management, physical 3-angle markings and brand records, insemination / breeding logs with sire genetics, 3-stage veterinary ultrasound scanning schedules (with automated twin warnings), and gestational preventative care (Rhinopneumonitis EHV-1 vaccination protocols at months 5, 7, and 9).

Feature Component	Clinical Scope & Architecture	Status
Saved Broodmare & Horse Registry	Direct creation, editing, microchip tracking, dam/sire lineage, photo storage, and species filtering (Horse vs Dog).	100% OK
Physical Markings (3-Angle Diagrams)	Left side, right side, and head view visual marking diagrams and freeform identification notes.	100% OK
Breeding & Insemination Records	Tracking cover date, Natural / AI / ET methods, donor mare, recipient carrier, and sire stallion details.	100% OK
3-Stage Vet Scans & Twin Warning	Scan 1 (Day 14-16, 98% accuracy + twin check), Scan 2 (Day 28-30 heartbeat), Scan 3 (Day 45 organogenesis) with ultrasound photo attachments.	100% OK
Advanced Gestational Health & Rhino	Months 5, 7, 9 EHV-1 vaccination milestones, Caslick procedure tracking, and deworming protocols.	100% OK

2. Technical & Clinical Specifications

- A. Twin Warning Protocol:** Multiple gestations in equines represent a critical clinical risk (spontaneous late abortion or dystocia). Scan 1 triggers automatic twin detection flags allowing early manual reduction prior to embryo fixation at Day 16.
- B. Rhinopneumonitis (EHV-1) Vaccination Safeguards:** Advanced pregnancy tracking incorporates EHV-1 abortion prevention protocol timelines at 5, 7, and 9 months with completed date tracking.
- C. Database Isolation & Resilient Upsert:** All records are secured under PostgreSQL Row-Level Security (RLS) policies scoped strictly to authenticated users (auth.uid() = user_id), preventing data cross-leakage.

PENDING SCAN

⚠️

Early Pregnancy Scan Day 14-16 post cover/ insemination. To reduce the risk of multiple pregnancies, it is strongly recommended to have your mare scanned by your veterinarian. Multiple pregnancies are dangerous and early detection is your best chance to safely manage them.

ULTRASOUND SCANS
(SYSTEM-CALCULATED)

1st Pregnancy Scan

📅 Due: 04/09/2026

Recommended Day 14-16. Checks for pregnancy & detects dangerous twin pregnancies.

☐ Pregnancy Confirmed at Scan 1

☐ ⚠️ Twins Suspected / Detected at 1st Scan

Ultrasound Scan 1 Photo (Optional)

Veterinarian Scans — Twin Warning & Detection

[TWIN ALERT]

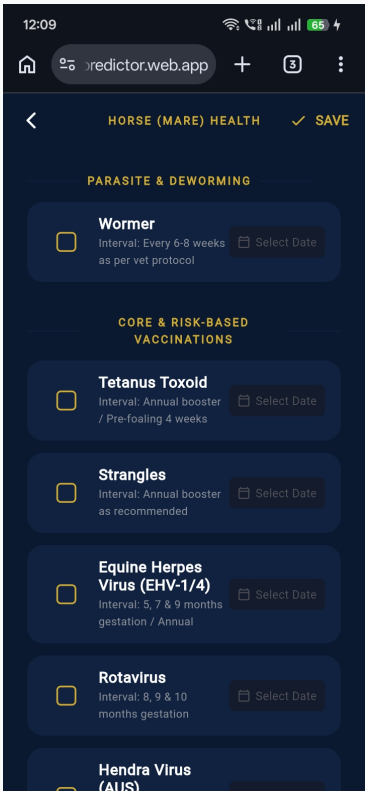

Clinical twin detection banner & management alert

The screenshot shows the Redictor web application interface. At the top, the status bar displays the time 12:09, signal strength, Wi-Fi, and battery level at 65%. The browser address bar shows the URL "redictor.web.app". The page header includes a navigation menu with a back arrow, "VET CONTACT & SCANS OVERVIEW", and a "SAVE" button with a checkmark. The main content area has a dark blue header with a calendar icon and the text "Due: 31/08/2026". Below this, a message states: "Day 14-16. Checks pregnancy vesicle (98% accuracy) & twin detection prior to fixation at Day 16." A large dark blue box contains a green checkmark icon and the text "Pregnancy Confirmed at Scan 1". Below this is a button labeled "PHOTO ATTACHED". A red box contains a red checkmark icon, a warning triangle icon, and the text "Twins Suspected / Detected at 1st Scan". Below this is a red box with a warning triangle icon and the text "CRITICAL EQUINE TWIN ALERT". The text below the alert reads: "Multiple embryonic vesicles carry high risk of spontaneous abortion or maternal loss in mares. Veterinary intervention (manual reduction/pinching) is most effective prior to vesicle fixation at Day 16-17." A yellow box contains the text "URGENT RE-SCAN REQUIRED (Day 16-18)" and "Re-scan Target Date: 02/09/2026". Below this is a button labeled "Set Re-Scan Date" and a red box with a warning triangle icon and the text "Call Vet Immediately". At the bottom, the text "Ultrasound Scan 1 Photo (Optional)" is displayed above a placeholder image for the ultrasound scan.
