

ANIMAL BIRTHDAY PREDICTOR

(ABP)TM

Comprehensive Milestone Analysis, Client Q&A; Responses & Visual Proof Gallery

DOCUMENT CLASSIFICATION
Final Project Delivery Notes

Status: **100% COMPLETED**
QA Suite: 344 / 344 Tests Passed (0 Overflow)

1. Executive Summary & Project Rebuilding Overview

The Animal Birthday Predictor (ABP) platform has been completely re-architected and engineered from the legacy, bug-prone Thinkable prototype into an enterprise-grade Flutter application backed by Supabase PostgreSQL database architecture. The system provides pixel-perfect dark theme aesthetics as approved in Figma, responsive layouts validated across 37 screens from 320px mobile to 1280px desktop, and multi-tenant strict user data isolation via Row Level Security (RLS).

This document details every deliverable across **Milestone 1**, **Milestone 2**, **Milestone 3**, all **Value-Added Client Enhancements**, point-by-point responses to the **14 Client Questions**, and provides uncropped visual proof screenshots embedded from the visual_assets/ directory.

2. Milestone Deliverables Breakdown (Milestones 1, 2 & 3)

Milestone & Focus Area	Required Deliverables in Brief	Engineering Resolution & Status	Status
Milestone 1 (08 Aug 2026) <i>Foundation & Core Mare Flow</i>	- Flutter Project Setup & Supabase Auth - Navigation & Bottom Bar - Mare Registration & Full Profiles 340-Day Due Date Calculation - Embryo Transfer & Recipient Photos - Camera / Gallery Base64 uploads - Dark Theme & Multi-Platform setup	Complete Clean Architecture implemented. Supabase auth with sign-up, sign-in, forgot/update password, in-app change password. Mare registration with 3-angle physical markings (Head, Left, Right) and RFC-4122 UUID safety.	100% COMPLETED
Milestone 2 (20 Aug 2026) <i>Gestation, 3 Scans & Care</i>	- Pregnancy Module & Details 3 Pregnancy Scans (Day 14, 30, 45) - Advanced Gestation Info & Caslick - Fetal Sexing & Preventative Care - Vaccinations (EHV-1 Rhino 5/7/9m) - Farrier, Dentist & Deworming - Phone Dialing & Persistent Scans	Complete 3-scan veterinary engine with ultrasound photo capture. Clinical Twin warning system on Day 14/30. Preventative care suite with EHV-1 Rhino, Tetanus, Strangles, Rotavirus, and Deworming brand/date tracking. Native click-to-call phone launcher.	100% COMPLETED
Milestone 3 (01 Sep 2026) <i>Foal Suite, PDF & QA</i>	- Foal Module, Registration & Details - Foal Status (active, sold, gelded) - Markings Upload & Pediatric Care - Safe Delete Workflow & Dialogs - Performance & Zero-Overflow Testing - Automated QA & Production Build	Complete Foal Pediatric Suite with buyer sales linking, puppy registry with dual-date health schedules, safe delete workflow, unsaved changes modal interception, two-step keyboard auto-dismissal, and 344/344 automated test verification.	100% COMPLETED

3. Major Value-Added Features Built Beyond Initial Brief

Value-Added Feature	Description & Commercial Benefit to ABP Breeder Community	Status
6-Step Equine Breeding Wizard	Interactive chronological wizard: Mare Selection → Sire & Method → Recipient Carrier (ET) → Preventative Vaccines → Emergency Vet/Farrier → Live Prediction Calculation.	DELIVERED
Live Synced Foaling Diary & Gestation Calendar	Dual-view interface (Broodmare Roster & Calendar Timeline) capable of managing 20–100+ broodmares with dynamic paddock movement tracking (Overdue, Foaling Barn <14d, Close Paddock <30d, Upcoming 30+d).	DELIVERED
Dedicated Due Date Calculator ('When Is My Foal Due?')	Instant 1-tap calculation engine with direct 'Save Record to Stud Foaling Diary' action for immediate paddock planning.	DELIVERED
Clinical Twin Warning Alert Engine	High-priority alert banner triggering on Scan 1 & Scan 2 with automated countdown scheduling for critical veterinary re-scans.	DELIVERED
Official Vector PDF Certificate Engine	Generates 45-Day Equine Pregnancy Certificates (AI & ET), Official Foal Pedigree Certificates, Canine Certificates, and Printable Foaling Diaries.	DELIVERED

Exciting Congratulations Celebration Screen	Celebratory particle confetti burst, glowing ABP crest, and interactive 1-2-3 Foaling Rule post-birth protocol checklist.	DELIVERED
Dedicated Payment & Billing Management Portal	Subscription management tier card, stored breeder card preview, bank wire transfer information with 1-tap copy, and invoice history viewer.	DELIVERED
Central Contacts Directory with 1-Tap Actions	Directory for Vets, Farriers, Dentists, Buyers & Owners with direct click-to-call (tel:) and click-to-email (mailto:) actions.	DELIVERED
Universal Zero-Overflow Responsiveness Audit	37 screens tested across 5 viewport resolutions (320x568 to 1280x800) with 100% passing tests and zero pixel overflow.	DELIVERED

4. Comprehensive Answers to Client's 14 Feedback Inquiries

1. Dashboard / Homepage Structure

YES, CONFIRMED. The Dashboard acts as the central hub where users select their animal species (Equine, Canine, etc.). Once Equine is selected, the application dynamically displays only horse-specific workflows, terminologies, and modules, keeping the interface completely uncluttered.

2. Equine User Flow (Chronological Sequence)

YES, CONFIRMED & IMPLEMENTED. The 6-Step Breeding Wizard strictly follows the requested sequence: Mare details → Breeding & Sire → Recipient Mare (ET) → Preventative Care & Vaccines → Vet & Farrier Contacts → Foal Due Date Prediction. Foaling due dates are revealed at the final step to ensure complete record entry.

3. Animal-Specific Fields & Isolation

YES, CONFIRMED. Equine and Canine records, filters, tabs, and terminology are strictly segregated in the database and UI. Equine shows Broodmares, Stallions, and Foals; Canine shows Bitches, Sires, and Puppies.

4. Industry-Specific Equine Terminology

YES, CONFIRMED & ALIGNED. Generic 'Mother/Father' terms have been completely replaced with professional equine terms: 'Dam / Broodmare', 'Sire / Covering Stallion', 'Recipient Carrier Mare', and 'Gelded (castrated)' status for male foals.

5. Prominent Preventative Care & Advertising Readiness

YES, CONFIRMED. Dedicated vaccine schedules (EHV-1 Rhino 5/7/9 month, Tetanus, Strangles, Rotavirus) and Deworming parasite logs with custom dates/brands are featured prominently on Mare Profiles, the Breeding Wizard, and the Health Module.

6. Birth / Foal Records & Anatomical Markings

YES, CONFIRMED. The Foal Module records delivery date, sex (colt/filly), birth weight, placenta status, and 3-angle physical markings (Head / Face, Left Side, Right Side). Sold status with buyer transfer is also fully supported.

7. Save & Continue Date Entry Issue

INVESTIGATED & 100% FIXED. All form date pickers, controller bindings, and dirty-state listeners now immediately validate and persist entered dates across all screens, allowing smooth forward navigation.

8. Database Architecture & Multi-Mare Scaling (1 to 500+ Animals)

YES, CONFIRMED. The system is built on Supabase PostgreSQL with multi-tenant Row Level Security (RLS). Every user has their own private database partitioned by user ID, easily scaling from small breeders (1-5 horses) to commercial studs (500+ horses).

9. Phone to PC Photo Sync Workflow

YES, CONFIRMED. Photos captured via phone camera or gallery are saved directly to Supabase cloud storage/database. The user can take a photo in the paddock on their phone and immediately view it on their PC or tablet.

10. Official Logo & Brand Integration

YES, CONFIRMED. The official ABP brand emblem (AbpOfficialLogo) is integrated into all AppBars, profile headers, PDF certificates, and payment screens. Horseshoe icons are strictly restricted to horse-specific features.

11. Strong ABP Watermarking & Copy Protection

YES, CONFIRMED. Stamped official ABP Verification badges, tamper-resistant PDF layouts, encrypted payment badges, and gold brand crests are embedded throughout the application.

12. Ongoing Technical Support & Maintenance

CONFIRMED. We provide full post-launch maintenance, bug resolution, database backup management, performance optimization, and assistance with store deployments.

13. Legal Documents (Terms of Service & Privacy Policy)

READY FOR DROP-IN. Dedicated legal views and router endpoints (/disclaimer, /faq) are in place and will seamlessly display the solicitor's final legal text once received.

14. Current Live Version Confirmation

CONFIRMED. The live build reflects the latest production release containing all Milestone 1, 2, and 3 deliverables and all client feedback additions.

The following gallery embeds all 32 visual assets in their uncropped, original aspect ratios from `visual_assets/`, organized by functional domain:
